ATTN : [REDACTED]

Chief Instructor, CI Familiarization

CI Familiarization Course Introduction

1. The attached copies of the proposed outline for Section I, Introduction, of the CI Familiarization course are forwarded for review and comment by R&A since this is a fairly basic section of the course. The history will not be dealt with in quite the detail the outline would indicate; it is simply set forth in this detail for ready reference. Suggestions for changes, deletions, or additions will be appreciated.

2. The introduction will be followed by a lecture on foreign intelligence services. Included in the lecture will be brief treatment of liaison and this will be coordinated with [REDACTED] who is preparing the C/S Liaison Operations course. The lecture will be accompanied by a handout listing the names and abbreviations of all the Orbit services. The middle three days of the course will be taken up with methods. The section on operations and the panel discussion will follow on the last day.
